

Deadlines for this week

- Teamwork self-reflection
 - Draft does not have to be 1500 words. Just hand in what you have at this point
- Video draft
 - Can use OBS Studio for making video's or Zoom

Gitlab:

- Issues should get weights
 - Should be dependent on how much time it takes
- Issues less vague
 - Add a description
 - Elaborate more which tasks should be completed for each issues

Does the end product need to look like the mockup?

End product does not have to look like the mockup. It should be based on the mockup and buttons should be around the same place, but does not have to look very professional.

Do we need to focus on UI?

UI only matters for user experience. Application should be easy and good to use.

We can ask non-computer science students for the HCI report feedback.

Feedback of TA:

- Only 10 days left, be careful about what you implement
- Deadlines
 - Self reflection
 - Product video
- For the next two weeks we will have 25 minute meetings. Our meeting will still be at 13:45
- In the board overview, add a string saying to which server you are connecting

Things to fix:

Minimal Application

- Reordering card (Morty)
- Websockets: background color, tags (Daniël)
- Removing cards (Daniël)

Multi board

- Copy an invite key (Jakub)

Card Details

- Double click open card (Lucas)
- See if description is available (Willem)
- To see task progress in overview (Willem)

Product Pitch:

- Daniël
 - Introduction
 - Server
- Morty
 - Boards overview
 - F1 Help overview
- Jakub
 - Board overview
- Willem
 - Tag overview
- Lucas
 - Card overview
 - Extension
 - Wrap-up
